ACCESSORIES

Wire management panel with plastic brackets

19" standard

Wire management panels are used for cable management inside the switchboard. They are supplied with plastic brackets and are designed for installation in 19" vertical rails. The outer dimension of a plastic bracket is 44 x 70 mm and its inner dimension is then 30 x 55 mm.

Surface treatment of metal parts of the panel is performed by powder technology in standard light gray RAL 7035 or black RAL 9005.
