

BSH 45 floor-cable holder 30600

CE
10/2022

Areas of application:

For laying of up to 45 sheathed cables with a 10 mm diameter in false floors.

Installation Guide:

For fastening by means of direct fastening tools.

The BSH Floor cable holder can be fixed by DSN Dowel Fastening nail or by using screw and rawplug.

- After fastening, lay in the cables.
- Bundle with cable ties where appropriate.
- Further BSH and Schnabl EC Euro-Clips (any size 16-50 mm) can be added.

Product details:

Colour	light grey
Content box	100

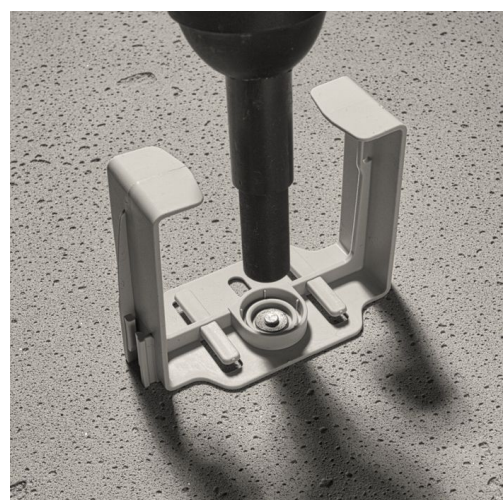

Product benefits/properties:

Time saving and cost effective alternative to cable- or basket trays, respectively professional alternative to cable laying without fixation. As many BSH as wished can be added, thus energy and data lines can be separated. Additionally, EC Euro Clips can be added in order to lay conduit lines alongside. The hanger loops at the base plate and the flanks serve for bundling lines by cable ties.

Technical data:

Material	PP, UV stabilised Temperature range: -10 °C up to +85 °C halogen-free
