

SXOK-24

FIBRE MANAGEMENT

Splice Cassette and Splice Sleeves

Width	168 mm
Depth	124 mm
Height	12 mm
Weight	81 g
Colour	blue
Operating temperature	-40 to +60 °C

Solarix splice cassettes have a unique system for physical management of different fibres, both within the inner part as well as the outer part of the cassette. The Solarix splice cassette is supplied with 2 splice holders which can accommodate up to 24 protection sleeves, transparent clip-in lid as well as a tray hinge to maintain access to splices with stacked trays.

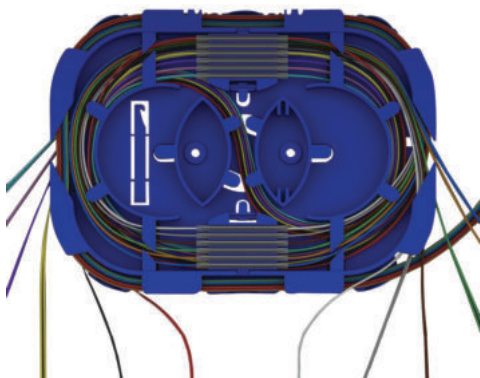

Solarix splice sleeves with a protective metal bar helps to protect the splices from damage. They are compatible with sleeve holders from the Solarix SXOK-24 cassette.

Part No.
